Root Server Deployment Update

Frank Salanitri

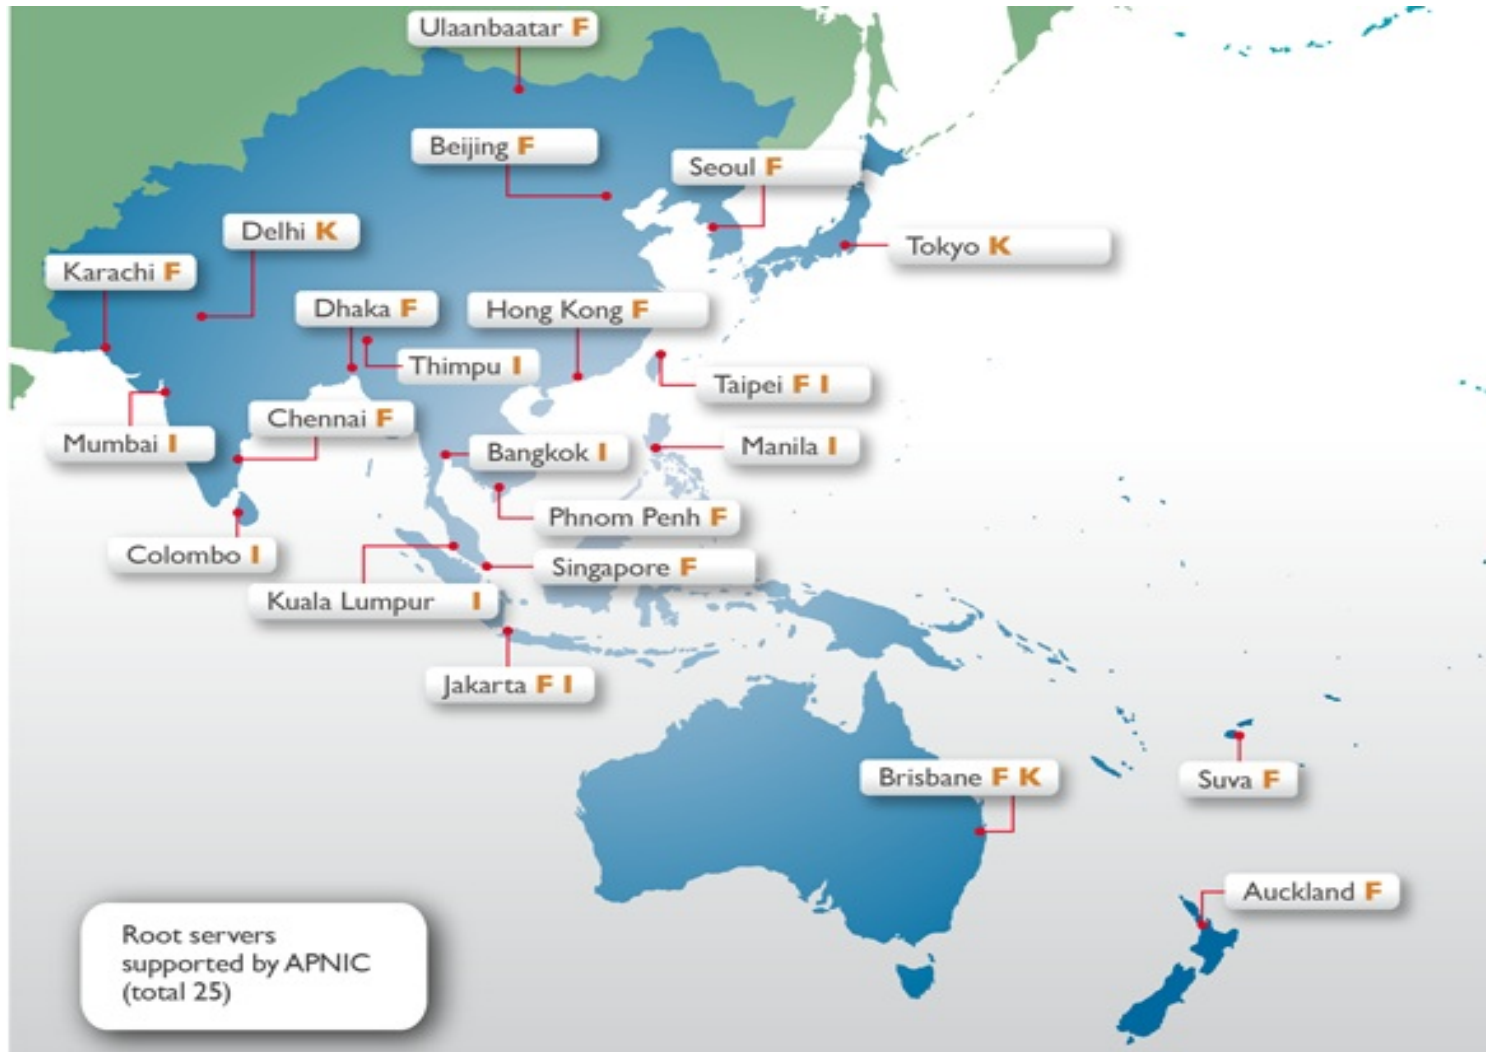

Project & Systems Services Manager, APNIC

RootServers in the Asia Pacific Region

- APNIC has supported Root Server deployments since 2002.
- The aim of this project has been to substantially improve internet reachability and response times in our region.
- This has direct benefits on ISPs and end-users alike.
- APNIC funds equipment and initial installation costs.
- The host funds datacenter rack space and all transit costs.
- 25 Root Servers instances funded partially or in full by APNIC. 14 F-root, 8 I-root, 3 K-root.
